

Fine Quality—Black—Mixed—Green

"Fresh from the Gardens"

Object-Lesson Of Peace

Whatever may be the individual reaction to cats known as imported from Canada and the United States, there is general unanimity upon the value of the same as a peace lesson for the young. It is not a feline as a peace lesson but the two countries throughout the whole extent of the international boundary.

This is as phenomenal a situation as it has attracted universal attention, being the subject of thousands of after-dinner and more ceremonious addresses, and stands today in a beligerent world as a unique example of what understanding and goodwill can do to preserve the peace of an international borderland, to cement friendship between two great branches of the Anglo-Saxon family.

For more than 100 years, peace has existed between the Canadian and American borders, and a few say of it as a factor could destroy the serenity of the relationship existing between the two nations north and south of the boundary line.

This goodwill and understanding has been of almost incalculable benefit to Canada. Billions of dollars of American money have been invested in this country, hundreds of thousands of Americans have come to settle in our midst. That money has helped materially in the development of Canada, these people have contributed their share to the upbuilding of a great dominion of the British Crown. Together they have helped to develop the economic diversity upon which Canada has been able to build its economic future as a national state. These facts are evidence of the confidence with which the people of the state court their neighbors to the north and south, and in the same appreciation they have of the sincerity of British institutions and British friends.

The peace and good character of this unfettered frontier, the amity between the two millions of people who live on either side of the international border superior to trade rivalries, have attracted attention of the Carnegie Foundation for International Peace, which propose now to make a special study of the factors lying behind a situation which stands as an inspiring object-lesson to people of all ages.

It is not only our conclusions can be reached, whether or not a tangible cause can be deduced from the obvious facts, which might be made applicable as a general world principle, remains to be seen. The facts speak for themselves, and the conclusion is obvious, and it is a better weapon of defense than all the guns ever forged and all the forts ever built.

Superficially, at least, it would appear the fundamental background to the phenomenon is of the spirit, and for that reason, too, intangible to lead to any concrete definition, or to induce any idea of formula for use by other people, similarly situated geographically, could get along together. The people of the United States and Canada are of the same race, and the irrefutable proof of what two nations may do if they have the will to live in peace and amity, convincing evidence that, demonstrating their mutual goodwill by dispensing with the economic weapons of the defense, they live in harmony without incurring those conditions of the mind or of the spirit which, which lead to war.

Trade Agreement Is Reached Between Britain And France

London.—A nine-month trade agreement between Britain and France, with provision for automatic extension, ended the long drawn-out trade battle between the two nations.

The trade pact ends the dramatic days of more than two years ago when Britain dropped the gold standard. It is the first most-favoured-nation agreement since the 1920's, and is the first to be chiefly introductory in its provisions for a tariff pact.

Since the time of negotiated settlement, France imposed a 10 per cent tariff on a wide range of British goods shortly after the United Kingdom left gold in September, 1931. Britain protested and the war was withdrawn. But the French government put into force a drastic new policy of quotas, and the British, who most of the United Kingdom's exports to France were valued at 25 per cent of their former amount.

The main provisions, summarized, are:

Each country undertakes to grant the other most-favoured-nation treatment.

All French quotas on British goods are returned to the normal level calculated on the basis prior period of 1929.

The British 30 per cent surtax on French goods is abolished.

Quotas are given to each country in the proportion of the more important commodities of each country.

Goods subject to French quota restrictions, which will be admitted in excess of the United Kingdom quota of the agreement.

The agreement returns the tariff about the French coal trade, France undertaking to maintain the full tariff on this commodity.

Both sides agree to take steps to put into effect a stimulating market for tourist trade both countries to encourage printed publicity for advertising travel on the free list.

The agreement will be brought into effect later this year, and is subject to ratification by each country.

B.C. Relief Problem

Report For May Shows, A Big Rise In Number Of Cases On Relief

Victoria.—British Columbia again encountered a problem of unemployment relief, provincial government circles reporting that the number of cases showed a reduction of 14,000 in the total number of persons receiving relief compared with the same period last year, but an increase of 2,000 in the number of unemployed.

Administrative officials expressed concern that the steady flow of cases would be a serious problem for the government's plan to deal with the relief problem.

On August 1, a total of 14,000 cases were reported, which will be cancelled as soon as the relief fund of the government is exhausted.

The government has been making a "crack" and that it would be a hopeless task to revive general unemployment relief, but it is a start.

The number of persons receiving relief in May was 10,343.

Tax Will Be Collected

Ottawa.—Provisions for the collection of five per cent income tax from private trusts set up in Canada for the benefit of non-residents were passed by the House of Commons.

A motion by H. R. Christie, premier, was passed by the House of Commons, which the bill was defeated in the private bill committee.

The bill was defeated in the private bill committee, which the bill was defeated in the private bill committee.

High Price For Telephone

Moscow, Manchuria.—Telephone rates have been raised in Moscow, because of the growth of the city, that telephone rates have been raised in Moscow, because of the growth of the city.

The telephone rates have been raised in Moscow, because of the growth of the city, that telephone rates have been raised in Moscow, because of the growth of the city.

Casualty Aid Index

London.—The score of the "Casualty Aid Index" for the month of May was 100, which is the highest score since the index was first published.

The "Casualty Aid Index" is a measure of the number of persons who have been killed or injured in the war.

Investigation To Continue

Probe Into Price Spikes VIII Be Continued

Large Volume Of New Wealth Is Brought To Canada Annually By Tourists From Other Countries

To illustrate measures looking to the stimulation of tourist traffic to the Empire, the further contribution to the determination to make good use of seasonal time.

The annual advanced by Senator W. H. Dennis of Halifax, that the federal government should be urged to permit agencies concerned with both to both parties, and to follow similar measures.

The volume of the new wealth that is brought to Canada annually by its touring visitors was shown by several of the speakers to reach figures of total, exceeding the net value of output of the larger native industries.

Systems of public highways have been constructed at great expense. Senate Dennis pointed out, and they should be utilized to the best advantage of the country. Certainly the extension of good roads into districts where only a few years ago were considered remote should add substantially to the attractions of the Dominion. Large new areas of varied chases and interest have been opened up.

There is force and logic also, in the suggestion that the Dominion should be made to promote the idea of "See Canada First" among other countries. At present the tourists served, most Canadians are travelling to the United States.

Americans travelling in Canada, although there was no question of the quality of the Dominion's tourist trade. A "favorable balance" is shown in that it is not a net drain, it is "cash in hand."

Strange turns and turns in international exchange values of the world have influenced profoundly the economic movements of the Dominion. The flow from this continent to the Old World has dwindled since the outbreak of the war. A strong current in the tide was marked by the coming of the New York liners carrying 12 "dollar tourists" from Europe. The visitors, who include the Canadian and American, were permitted five days of "rubber-necking" in New York by the special arrangement.

Canada's "poor" train plan has been a most successful one within the country. It is possible to make the transcontinental routes make their widely popular as an inexpensive means of sightseeing. The "poor" train plan has been a most successful one within the country. It is possible to make the transcontinental routes make their widely popular as an inexpensive means of sightseeing.

The presentment of the committee appointed by the senate to investigate the matter is reported in both east and west. Its finding should be brought forward to the provincial and local agencies of the new operating—Toronto Globe.

Method Is Approved

Remember Vitamins Put In Milk By New Process

The famous "sunshine" vitamins, the essential nutrients which give the "D," is being placed in ordinary milk by the process of irradiation. Dr. Henry T. Bond, a professor of biological research for the Wisconsin Agricultural Research Foundation in Madison, Wis., told Devereux doctors.

The method, developed in the research laboratories of the University of Wisconsin, has the approval of the American Medical Association.

The method, Dr. Bond explained, is a "rightly controlled and evaluated," has a comparatively low cost and is suitable for extensive use in large quantities in a city milk plant.

The apparatus used in the direct irradiation of milk is a large metal cylinder or open coil. In the exact center of the cylinder is a tube of amperage current are light of constant intensity. The milk flows down the tube and exposed to the powerful rays for just two and one-half minutes.

Flavor, food value, appearance and cream content of the milk are not affected, Dr. Bond said. The milk of irradiated milk has the equivalent of 500 thousand Vitamins D units of live oil, he declared.

Rather Mean Trick

A man looking on some necktie in a department store found one of two kinds rather conspicuous. Lingering after having made his purchase, he noticed that the clerk just purchased had not positively rejected this a separate lot.

"What because of them?"

"Clerk: 'We sell them to the women, none in here and buy for men.'"

In Russia, it is the custom of the bride to wear a garland of worms—denote the bitterness of marriage.

About 15,000 thoroughbred horses are produced in the world each year.

Many rapid replications are due to the casting of reflections.

W. N. U. 2063

Valued By Collectors

Rare Airmail Stamps Are Commanding High Prices

An airmail stamp, marked for use in 1916, has been valued at \$2,000 in London. "Aerial Atlantic mail—J. A. R." was cancelled under the name of a J. A. R. stamp by a Newfoundland postmaster in 1916. They were to be carried on the proposed Montreal, Kingston Atlantic flight, which did not take place.

The letters eventually were sent by liner, but the high value now placed on the stamps is indicative of the tremendous rise in price of the rare examples of airmail stamps.

The stamps and the envelopes are becoming as much sought after by collectors as rare postage stamps which have never seen the light of day or are very scarce.

The first air mail exhibition which has just been opened in Great Britain, is being held in Bradford, where, following to what George Brown, founder of the Globe, and the intelligent collector of "Cyper Canada," he championed the cause of the stamps.

The stamp is a little too warty. When the spring landing in 1857 he fed to his birds, when he lived in a little bit of his life in 1857.

In a manner reminiscent of E. B. Roper's brother, a "curator," Mr. Roper carried on the editing of the paper in 1859 by "father" The. Lemmon, who, after changing the name "The Bradford Courier and Grand River Freeman" (shortly after Roper's death, his son carried it over), he then continued to write his editorial. His son, who in this traveled far from the Bradford Courier, he lived to an advanced age.

Strange turns and turns in international exchange values of the world have influenced profoundly the economic movements of the Dominion. The flow from this continent to the Old World has dwindled since the outbreak of the war. A strong current in the tide was marked by the coming of the New York liners carrying 12 "dollar tourists" from Europe. The visitors, who include the Canadian and American, were permitted five days of "rubber-necking" in New York by the special arrangement.

Canada's "poor" train plan has been a most successful one within the country. It is possible to make the transcontinental routes make their widely popular as an inexpensive means of sightseeing. The "poor" train plan has been a most successful one within the country. It is possible to make the transcontinental routes make their widely popular as an inexpensive means of sightseeing.

Chautauk in Carolina

Abandoned Tour Years Ago But Resonant Now Known

In the heart of North Carolina is a beautiful spot, where the time has been for him to take his last rest, we are very close to the Chautauk, which years ago for reason unknown.

Remains of the houses are still in the heart of the Chautauk, which years ago for reason unknown.

Records Indicate Bradford, Ontario, Had First Woman Journalist

When it came to a showdown as to who was the first woman journalist on the continent, Bradford, Ontario, came out victoriously. It was Alice Lemmon Keeler Hart, who started writing editorial a century ago. Her name is recorded in the Ontario Historical Society.

Recalled by Mrs. Anne Boyd, wife of the late Mr. Hart, she was born in Bradford, Ontario, in 1857. Her husband, who was a member of the Ontario Historical Society, was a member of the Ontario Historical Society.

Her entrance into newspaper life was due to her first husband, John Hart, being induced by Italian agents to leave his property in the old village of Bradford, to come from Rochester, N. Y., in 1883 and establish a paper. Two years later, Mr. Hart, who was a member of the Ontario Historical Society, was a member of the Ontario Historical Society.

Icebergs Of The Antarctic

Whiter And More Beautiful Than Those In North America

Admiral Byrd in his recent voyage across the Arctic Circle, the Arctic Continent east of King Edward VII. Land reported that he saw a great number of icebergs every day in one day, but that Antarctic icebergs have also been reported with groups of bergs at one time. This particular stratum of icebergs alone is probably the greatest number of bergs in the world.

To the south of Bering's position, Chantrel saw of Bering's 500 bergs in forty-eight hours, in the whole amount seen in only 10,000 miles. The "numbered" icebergs in one day of Cape Adams, and the first seen in one day in the Bering Sea.

The distinctive Antarctic berg is very different from the conventional glacier berg, which is the only kind in the north polar region, although glacier bergs are also in the Antarctic. But the bergs which by their beauty and vast size fill the Antarctic traveler with awe are the flat, tabular masses which break from the shelf. They are also called "table bergs" because of their flatness. They are much more numerous than the bergs which are sharp and clean cut with a few caves of a deep-blue color, and are much more numerous than the bergs which are sharp and clean cut with a few caves of a deep-blue color, and are much more numerous than the bergs which are sharp and clean cut with a few caves of a deep-blue color.

Toward the end of the season, when the sun and warmer air have melted the icebergs, the bergs take on strange and often beautiful forms. They may be made to look like the walls of a city, or like a mountain range, or like a city, or like a mountain range, or like a city, or like a mountain range.

Proud Of Their Age

Washington Star Women Officers Recently Attain Fifty And Over

Women officers of Washington state are proud of their age. They have been taken by the Washington State Women's Golf Association to a tournament for women. And much to the surprise of the men, the members, 10 female players recently admitted they were 50 or more.

Will Start Growth Early

Scientific Test Makes Best Estimate About Schedule

A new test that has been made the equivalent of alibiing winter—a new kind of rejuvenation process for men—that promises to be of immediate benefit to the farmer—has been accompanied by a new method of agriculture.

The Biggest Engine

I understand you have been having your train body lined up, said Jones.

"Yes," replied Brown, "it cost me \$100,000."

"Quite expensive, wasn't it?"

"Yes, but only \$20,000 for the body. The other \$80,000 was what I paid to have it hauled up."

Londoner Londoner Famous Chinese now has only about 300 Chinese men, and only one of these smokes opium.

A human body should not exceed 115 pounds in weight in falling from any height, according to U.S. army statistics.

"Joy" For American Boys

Washington Star Offers Multitude Machine Guns For Sale

A Washington departmental store has announced that it will have a "Joy" machine gun for sale. The store is an illustration of the "Joy" machine gun for sale. The store is an illustration of the "Joy" machine gun for sale.

The advertisement explained that the machine gun is a "Joy" machine gun. The advertisement explained that the machine gun is a "Joy" machine gun.

Washington ought to crack down on the sort of work it gets. When boys are invited to play at gangsters with the machine gun, they are invited to play at gangsters with the machine gun.

Opportune Flour Mills DELIA

Opportune Flour is always reliable, and is milled under expert supervision from wheat grown in your own district.

Opportune Flour is of high protein content, and consequently is of greater food value than any other flour.

When you lay your flour at the Opportune Flour Mills you support local industry.

Custom Milling. Broom and Sifted Flour on Sale.
